Mid-level QA Automation Engineer with 4 years building C#/.NET test frameworks for enterprise SaaS products. Expert in BDD with SpecFlow and end-to-end Selenium pipelines integrated into Azure DevOps. Passionate about shift-left testing, quality ownership within Agile squads, and making CI gates the last line of defence — not an afterthought.

PROFESSIONAL EXPERIENCE

- QA Automation Engineer** May 2023 – Present
UiPath · Bucharest, Romania (RPA / Enterprise Software)
 - Built and maintained 1,400+ SpecFlow scenarios in C# covering Platform UI, licensing APIs, and workflow designer.
 - Migrated flaky Selenium Page Object suite to Playwright; cut test execution time 45% and eliminated 90% of false positives.
 - Implemented parallel execution on Azure Pipelines using Selenium Grid Docker; reduced full regression from 4h to 38min.
 - Introduced Allure reporting with per-sprint dashboards; enabled product team to track defect escape rate weekly.
 - Owned API contract testing with Postman / RestSharp, catching 12 breaking changes before production over 18 months.
- Junior QA Automation Engineer** Sep 2021 – Apr 2023
Bitdefender · Bucharest, Romania (Cybersecurity)
 - Wrote C# + NUnit automated tests for GravityZone cloud console covering 6 security policy modules.
 - Collaborated with dev team in 2-week sprints; maintained living documentation via Gherkin feature files.
 - Created T-SQL scripts for database-state validation; found 7 data corruption defects missed by UI tests.
 - Performed load testing with k6 on REST endpoints; identified bottleneck reducing endpoint throughput by 60%.
- Manual QA Tester (Intern → Junior)** Jul 2020 – Aug 2021
ASSIST Software · Suceava, Romania (Custom Software)
 - Executed manual regression on healthcare and logistics web apps; logged 300+ Jira defects with detailed reproduction steps.
 - Began automation journey by scripting first Selenium tests in C# — adopted by team within 3 months.

PROJECTS

- AutoFrame-CS (Open Source)**
C# framework template with SpecFlow, Playwright, Allure and Azure Pipelines config. 340 GitHub stars.
- API Mock Validator**
Internal tool generating WireMock stubs from OpenAPI specs — speeds contract-test setup from days to minutes.
- Legacy Selenium 3 Suite**
60% flaky IE11-era suite — deprecated 2022. Maintained 6 months while Playwright migration ran in parallel.
- Performance Baseline Dashboard**
k6 + Grafana + InfluxDB dashboard tracking p95 latency across 22 API endpoints across every release.
